With some personal reflections.

The Editor.

In one of your last numbers you kindly referred to the colonies and settlements of the southern emisphere as 'colony ideas,' and perhaps I may be excused for taking up the subject.

The term 'colony' is generally applied to any country or territory which is governed by a colony of people from another country, and which is either dependent on or subject to the influences of another nation. In this sense, a colony may be defined as a country or territory which is governed by a colony of people from another country, and which is either dependent on or subject to the influences of another nation.

The term 'colony' is also sometimes used to denote a country or territory which is governed by a colony of people from another country, and which is either dependent on or subject to the influences of another nation. In this sense, a colony may be defined as a country or territory which is governed by a colony of people from another country, and which is either dependent on or subject to the influences of another nation.
