

HIROSHIMA NEVER AGAIN 60 YEARS OF NUCLEAR TERROR NUCLEAR DISARMAMENT NO URANIUM MINING RALLY AND MARCH

SUNDAY AUGUST 7 STATE LIBRARY 1PM

Peace - Renewable Energy - Land Rights

On the 60th anniversary of the nuclear bombing of Hiroshima, it's time to renew the call Never Again! The threat of nuclear genocide persists. Rather than abolishing nuclear weapons, many countries are turning toward nuclear weapons, and others such as the USA are developing new ones.

In the war on Iraq the USA has used large quantities of depleted uranium, causing toxic and radioactive contamination which will persist for many millennia and without any clean-up being undertaken or planned.

Rather than pursuing sustainable renewable energy the Australian government is talking up nuclear power and doing all it can to increase uranium mining. Nuclear power is dirty, unsafe, unsustainable and produces the fuel for nuclear weapons.

Uranium mining is a potent example of continued denial of their rights to their land for Australia's indigenous people. Australian mining of uranium is being used in war. Australia faces the largest increase in uranium mining ever seen. Uranium prices are skyrocketing and the government is doing all it can to remove any impediments to an increase in uranium mining.

AFTER RALLY FESTIVAL
Multicultural festival featuring
Traditional Japanese Drummers and dancers
2-4 PM Federation Square Sunday August 7th

Organised by Nuclear Free Australia - www.nukefreeaus.org
Organised in conjunction with the Melbourne Stop The War Coalition.
