

EDITORIAL

A special general meeting convened at the Clubroom on the 16th July 1973 agreed unanimously that the Campaign is to become an Incorporated body.

The reasons for this decision are manifold, however in brief, incorporation will mean that we will become a legal entity as from date of Incorporation.

This means: one, members, as well as the committee are protected against any legal action taken against the Campaign for debts contracted. Two, the financial structure of the organisation is protected against unauthorized use of funds, e.g. members wishing to bequeath property or money to the Campaign by deed or in their will are able to do so without fear that those assets may be squandered for the benefit of an individual.

Three, the Campaign will be able to acquire real property, "a house or land" in its own name.

Four, the Campaign has the ability to sue, 'or be sued', to sustain rights of property, or to conduct other civil suits in a court of law.

Recent events have shown that this is a most necessary move. In future it would be very much more difficult for individuals to milk our organisation of much needed funds.
