

## NO WAR BUT THE CLASS WAR

Until such time that *all states* are abolished and replaced by a world federation of communities and workplaces, war will continue to recur. Even in so-called 'peacetime' there is war; by boss against worker, by the State against humanity.

Only working people, that is, those engaged in socially useful production, and organized internationally against all bosses (U.S., Iraqi, whatever), can bring about a lasting peace because they do not need to exploit others.

The Anarcho-Syndicalist Federation is engaged in rebuilding the International Workers Association which was nearly destroyed by Nazi Germany and the Stalinist USSR in World War II.

We invite all those who wish for true world peace to participate in this reconstruction which history is proving the only alternative.
